at spot using LOAD_FILE Linux Sorry to bother you, I have a problem. I am a beginner, I want to insert some value at a spot in text file, and it works fine for regular text. However, in my case, I have a file that contains binary information. I want to change the value of this binary information at a certain position, and save it, but it doesn't work. How to convert binary text into other data format? I hope someone can help me. Here is my code: EditText editText; EditText editText2; @Override

```java
protected void onCreate(Bundle
savedInstanceState) { super.onCrea
te(savedInstanceState); setContent
View(R.layout.activity_main);
editText = (EditText)
findViewById(R.id.editText);
editText2 = (EditText)
findViewById(R.id.editText2);
editText.setText("012345");
editText2.setText("C3");
BufferedReader reader = null; try {
File file = new
File("c:/Users/Green Tracker/Desk
top/Program/test.txt");
FileInputStream inputStream =
```

new FileInputStream(file); reader = new BufferedReader(new InputStreamReader(inputStream)); String line = reader.readLine();
